Retrofit Best Practice

What: Woody's Food Stores – YESCO Indianapolis

The Situation:

The Woody's convenience store located in Kokomo, IN had enough of their 'inconvenient' exterior lighting. The property's dull and dingy appearance was a product of eighteen 245 watt, T12 fixtures.

T12 to LED Retrofit

The Solution:

YESCO Indianapolis replaced the existing system with 88 watt LED fixtures. These new fixtures provided the customer with a brighter and cleaner image along with sizable maintenance savings and a rebate that sealed the deal.

SAVINGS 157 watts per fixture | \$85 in rebate per fixture
